Journal of Electroanalytical Chemistry 472 (1999) 189–191

JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject Index of Volume 472

Acrylonitrile
Investigation of the cathodic electropolymerization of acrylonitrile, ethylacrylate and methylmethacrylate by coupled quartz crystal microbalance analysis and cyclic voltammetry, 83
Ac voltage
Photoresponse of a titanium dioxide chemical sensor, 137
Adsorption-induced self-organization
Self-organization of α-cyclodextrin on Au(111) surfaces induced by potential controlled adsorption, 163
Agrochemistry
Electrochemical properties of three dicarboximide-type pesticides: vinclozoline, iprodione and procymidone, 33

Benzotriazole
Effect of sodium dodecylsulfate on copper corrosion in sulfuric acid media in the absence and presence of benzotriazole, 112
Bipolaron
Electrochemical generation of cation radical π-dimers in polymer film composed of pentathiophenes bridged by monosilanylene units, 157

Charge transfer resistance
Electrochemical impedance spectroscopy of thin films with two mobile charge carriers: effects of the interfacial charging, 7
Chemical sensor
Photoresponse of a titanium dioxide chemical sensor, 137
Chronoamperometry
Chronoamperometry of strong acids without supporting electrolyte, 1
Concentration profiles
Voltammetric currents for any ligand-to-metal concentration ratio in fully labile metal-macromolecular complexation. Easy computations, analytical properties of the currents and a graphical method to estimate the stability constant, 42
Copper
Effect of sodium dodecylsulfate on copper corrosion in sulfuric acid media in the absence and presence of benzotriazole, 112
Corrosion inhibition
Effect of sodium dodecylsulfate on copper corrosion in sulfuric acid media in the absence and presence of benzotriazole, 112
α-Cyclodextrin
Self-organization of α-cyclodextrin on Au(111) surfaces induced by potential controlled adsorption, 163

DEMS
Ethanol oxidation on PtRu electrodes studied by differential electrochemical mass spectrometry, 120
Dicarbox-type pesticides
Electrochemical properties of three dicarboximide-type pesticides: vinclozoline, iprodione and procymidone, 33
Differential electrochemical mass spectrometry
Adsorption, oxidation and reduction reactions of propargyl alcohol on palladium as studied by electrochemical mass spectrometry, 71

π-Dimer
Electrochemical generation of cation radical π-dimers in polymer film composed of pentathiophenes bridged by monosilanylene units, 157
Dissociation products
Interaction of H, O and OH with metal surfaces, 126
Doping
Electrochemical generation of cation radical π-dimers in polymer film composed of pentathiophenes bridged by monosilanylene units, 157

Effective hydrogen chemical potential
Electrochemical formation of nickel hydride in alkaline solutions, 182
Electroactive polymers
Electrochemical impedance spectroscopy of thin films with two mobile charge carriers: effects of the interfacial charging, 7
Electrocatalytic oxidation
Ethanol oxidation on PtRu electrodes studied by differential electrochemical mass spectrometry, 120
Electrochemical impedance spectroscopy
Studies on the redox behaviour of some polythiophene derivatives by impedance spectroscopy in symmetrical and asymmetrical configurations, 20
Electrochemical properties
Electrochemical properties of three dicarboximide-type pesticides: vinclozoline, iprodione and procymidone, 33
Electrocoating
Investigation of the cathodic electropolymerization of acrylonitrile, ethylacrylate and methylmethacrylate by coupled quartz crystal microbalance analysis and cyclic voltammetry, 83
Electrodeposition
Nucleation and growth of poly(3,4-ethylenedioxythiophene) in acetonitrile on platinum under potentiostatic conditions, 103
Electrografting
Investigation of the cathodic electropolymerization of acrylonitrile, ethylacrylate and methylmethacrylate by coupled quartz crystal microbalance analysis and cyclic voltammetry, 83
Electrolytes
Inhibition effects of polyacrylonitrile gel electrolytes on lithium dendrite formation, 142
Electron microscopy
Structure and electrochemical behavior of a flavin sulfide monolayer adsorbed on gold, 147
Ellipsometry
Investigation of the cathodic electropolymerization of acrylonitrile, ethylacrylate and methylmethacrylate by coupled quartz crystal microbalance analysis and cyclic voltammetry, 83
Ethanol
Ethanol oxidation on PtRu electrodes studied by differential electrochemical mass spectrometry, 120
Ethylacrylate
Investigation of the cathodic electropolymerization of acrylonitrile, ethylacrylate and methylmethacrylate by coupled quartz crystal microbalance analysis and cyclic voltammetry, 83

PII: S0022-0728(99)00324-1

Euler's theorem
A reply to the question of whether the internal energy of solid interfaces can be of a non-homogeneous nature, 174
Can the internal energy function of solid interfaces be of a non-homogeneous nature?, 168

Flavins
Structure and electrochemical behavior of a flavin sulfide monolayer adsorbed on gold, 147

Gallium electrode
Electrode kinetics and the nature of the metal electrode: Part 4. The Zn(II)/Zn electrode reaction studied at dropping Tl + Ga alloy electrodes, 64
Electrode kinetics and the nature of the metal electrode: Part 3. The Zn(II)/Zn electrode reaction studied at In + Ga dropping (micro)electrodes, 53
Galvanic tungsten
On the pH sensitivity of the galvanic tungsten–water interaction product, 178
Gibbs adsorption equation
A reply to the question of whether the internal energy of solid interfaces can be of a non-homogeneous nature, 174
Gold
Adsorption, oxidation and reduction reactions of propargyl alcohol on palladium as studied by electrochemical mass spectrometry, 71

High pressure electrolysis
Electrochemical formation of nickel hydride in alkaline solutions, 182
Homogeneous functions
Can the internal energy function of solid interfaces be of a non-homogeneous nature?, 168

Impedance
Electrochemical impedance spectroscopy of thin films with two mobile charge carriers: effects of the interfacial charging, 7
Indium electrode
Electrode kinetics and the nature of the metal electrode: Part 3. The Zn(II)/Zn electrode reaction studied at In + Ga dropping (micro)electrodes, 53
Inhibition
Inhibition effects of polyacrylonitrile gel electrolytes on lithium dendrite formation, 142
In-situ scanning tunneling microscopy (STM)
Self-organization of α-cyclodextrin on Au(111) surfaces induced by potential controlled adsorption, 163
Interfacial charging
Electrochemical impedance spectroscopy of thin films with two mobile charge carriers: effects of the interfacial charging, 7
Interfacial work
A reply to the question of whether the internal energy of solid interfaces can be of a non-homogeneous nature, 174
Ionic interaction
Chronoamperometry of strong acids without supporting electrolyte, 1
Ion pair formation
Kinetic studies on ion pair formation between 2,3,5,6-tetrachloro-1,4 benzoquinone anion radical and alkaline earth metal cations (RPS 6708), 91

Kinetics
Electrode kinetics and the nature of the metal electrode: Part 4. The Zn(II)/Zn electrode reaction studied at dropping Tl + Ga alloy electrodes, 64
Electrode kinetics and the nature of the metal electrode: Part 3. The Zn(II)/Zn electrode reaction studied at In + Ga dropping (micro)electrodes, 53
Kinetic studies on ion pair formation between 2,3,5,6-tetrachloro-1,4 benzoquinone anion radical and alkaline earth metal cations (RPS 6708), 91

Light illumination
Photoresponse of a titanium dioxide chemical sensor, 137
Lippmann equation
Can the internal energy function of solid interfaces be of a non-homogeneous nature?, 168
Lithium
Inhibition effects of polyacrylonitrile gel electrolytes on lithium dendrite formation, 142

Macromolecular complexation
Voltammetric currents for any ligand-to-metal concentration ratio in fully labile metal-macromolecular complexation. Easy computations, analytical properties of the currents and a graphical method to estimate the stability constant, 42
Metal surfaces
Interaction of H, O and OH with metal surfaces, 126
Methylmethacrylate
Investigation of the cathodic electropolymerization of acrylonitrile, ethylacrylate and methylmethacrylate by coupled quartz crystal microbalance analysis and cyclic voltammetry, 83
Migration
Chronoamperometry of strong acids without supporting electrolyte, 1
Mixed conductivity
Electrochemical impedance spectroscopy of thin films with two mobile charge carriers: effects of the interfacial charging, 7
Monolayers
Structure and electrochemical behavior of a flavin sulfide monolayer adsorbed on gold, 147

Nernst–Planck equation
Chronoamperometry of strong acids without supporting electrolyte, 1
Nickel hydrides
Electrochemical formation of nickel hydride in alkaline solutions, 182
Non-linear diffusion
Voltammetric currents for any ligand-to-metal concentration ratio in fully labile metal-macromolecular complexation. Easy computations, analytical properties of the currents and a graphical method to estimate the stability constant, 42
Nucleation and growth mechanisms
Nucleation and growth of poly(3,4-ethylenedioxythiophene) in acetonitrile on platinum under potentiostatic conditions, 103

Organosilicon polymer
Electrochemical generation of cation radical π-dimers in polymer film composed of pentathiophenes bridged by monosilanylene units, 157
Overvoltage
Electrochemical formation of nickel hydride in alkaline solutions, 182

Palladium
Adsorption, oxidation and reduction reactions of propargyl alcohol on palladium as studied by electrochemical mass spectrometry, 71
Pentathiophene
Electrochemical generation of cation radical π-dimers in polymer film composed of pentathiophenes bridged by monosilanylene units, 157

pH sensitivity
On the pH sensitivity of the galvanic tungsten–water interaction product, 178
Platinum
Adsorption, oxidation and reduction reactions of propargyl alcohol on palladium as studied by electrochemical mass spectrometry, 71
Polyacrylonitrile
Inhibition effects of polyacrylonitrile gel electrolytes on lithium dendrite formation, 142
Poly(3,4-ethylenedioxythiophene)
Nucleation and growth of poly(3,4-ethylenedioxythiophene) in acetonitrile on platinum under potentiostatic conditions, 103
Poly(3-methyl thiophene)
Studies on the redox behaviour of some polythiophene derivatives by impedance spectroscopy in symmetrical and asymmetrical configurations, 20
Poly(3-thienyl methacrylate)
Studies on the redox behaviour of some polythiophene derivatives by impedance spectroscopy in symmetrical and asymmetrical configurations, 20
Poly(thiophene-3-methanol)
Studies on the redox behaviour of some polythiophene derivatives by impedance spectroscopy in symmetrical and asymmetrical configurations, 20
Propargyl alcohol
Adsorption, oxidation and reduction reactions of propargyl alcohol on palladium as studied by electrochemical mass spectrometry, 71
PtRu electrode
Ethanol oxidation on PtRu electrodes studied by differential electrochemical mass spectrometry, 120
Pulse electrolysis stopped-flow method
Kinetic studies on ion pair formation between 2,3,5,6-tetrachloro-1,4 benzoquinone anion radical and alkaline earth metal cations (RPS 6708), 91
Pulse polarography
Voltammetric currents for any ligand-to-metal concentration ratio in fully labile metal-macromolecular complexation. Easy computations, analytical properties of the currents and a graphical method to estimate the stability constant, 42
pWO_4^{2-} sensitivity
On the pH sensitivity of the galvanic tungsten–water interaction product, 178

Quartz crystal microbalance
Investigation of the cathodic electropolymerization of acrylonitrile, ethylacrylate and methylmethacrylate by coupled quartz crystal microbalance analysis and cyclic voltammetry, 83

Redox behaviour
Studies on the redox behaviour of some polythiophene derivatives by impedance spectroscopy in symmetrical and asymmetrical configurations, 20
SERS
Effect of sodium dodecylsulfate on copper corrosion in sulfuric acid media in the absence and presence of benzotriazole, 112
Sodium dodecylsulfate
Effect of sodium dodecylsulfate on copper corrosion in sulfuric acid media in the absence and presence of benzotriazole, 112
Speciation
Voltammetric currents for any ligand-to-metal concentration ratio in fully labile metal-macromolecular complexation. Easy computations, analytical properties of the currents and a graphical method to estimate the stability constant, 42
Stability constant
Voltammetric currents for any ligand-to-metal concentration ratio in fully labile metal-macromolecular complexation. Easy computations, analytical properties of the currents and a graphical method to estimate the stability constant, 42
Strong acids
Chronoamperometry of strong acids without supporting electrolyte, 1
Supporting electrolyte
Chronoamperometry of strong acids without supporting electrolyte, 1
Surface energy
Can the internal energy function of solid interfaces be of a non-homogeneous nature?, 168
Surface stress
A reply to the question of whether the internal energy of solid interfaces can be of a non-homogeneous nature, 174

Thallium electrode
Electrode kinetics and the nature of the metal electrode: Part 4. The Zn(II)/Zn electrode reaction studied at dropping Tl + Ga alloy electrodes, 64
Thin film
Electrochemical impedance spectroscopy of thin films with two mobile charge carriers: effects of the interfacial charging, 7
Titanium dioxide
Photoresponse of a titanium dioxide chemical sensor, 137

Voltammetry
Voltammetric currents for any ligand-to-metal concentration ratio in fully labile metal-macromolecular complexation. Easy computations, analytical properties of the currents and a graphical method to estimate the stability constant, 42

Water
Interaction of H, O and OH with metal surfaces, 126

X-ray photoelectron spectroscopy
Structure and electrochemical behavior of a flavin sulfide monolayer adsorbed on gold, 147

Zn(II) reduction
Electrode kinetics and the nature of the metal electrode: Part 4. The Zn(II)/Zn electrode reaction studied at dropping Tl + Ga alloy electrodes, 64
Electrode kinetics and the nature of the metal electrode: Part 3. The Zn(II)/Zn electrode reaction studied at In + Ga dropping (micro)electrodes, 53
